

M. VISHNUSANKAR

233/E Millgate, Opposite Street, Cholapuram South, Murambu | 9791766926 | raj08vishnu@gmail.com

PROFESSIONAL SUMMARY

BIM Automation Engineer with 10 months of experience building Python and C#-based automation for Autodesk Revit and AutoCAD workflows. Skilled in Revit API, pyRevit, and add-in development to streamline MEP and Civil documentation. Experienced integrating AI with BIM platforms via Model Context Protocol (MCP), combining engineering fundamentals with strong programming and data analysis skills.

TECHNICAL SKILLS

Programming & Development: Python, C# (.NET), OOP, SQL, JSON, Git & GitHub, Visual Studio / VS Code, Debugging & Troubleshooting

BIM & CAD Automation: Autodesk Revit, Revit API, pyRevit, Revit Add-in Development, AutoCAD Automation, BIM Modeling, Engineering Drawing Interpretation

AI & Data: Model Context Protocol (MCP), Artificial Intelligence, Machine Learning, Data Science, Data Analysis, Prompt Engineering, REST API Integration

Engineering & Professional: Mechanical Engineering Fundamentals, Automation Workflow Development, Problem Solving, Analytical Thinking, Team Collaboration, Communication, Time Management

PROFESSIONAL EXPERIENCE

BIM Automation Engineer

Innowell Engineering International Pvt Ltd

Jan 2025 – Present
India

- Developed custom Revit and AutoCAD add-ins for MEP and Civil disciplines, automating repetitive modeling and drafting tasks and significantly reducing manual processing time.
- Built Revit MCP integration to connect Revit with Claude AI, enabling natural-language-driven automation of modeling workflows.
- Designed a standalone server-client MCP architecture to connect Revit without relying on an LLM, improving system flexibility and reliability.
- Created pyRevit routes to pass structured payloads for automating modeling and drawing data extraction, and tested/debugged Python and C# scripts for production readiness.

PROJECTS

- Revit & AutoCAD MEP/Civil Automation Add-ins** — Built add-ins automating repetitive MEP and Civil modeling tasks.
- Revit–Claude MCP Integration** — Connected Revit to Claude AI via Model Context Protocol for natural-language automation.
- Standalone MCP Server-Client Architecture** — Built a lightweight Revit connection independent of any LLM model.
- pyRevit Payload Automation Routes** — Automated modeling and drawing data extraction via structured payloads.

EDUCATION

B.Tech, Artificial Intelligence and Data Science

Ramco Institute of Technology — CGPA: 7.67 / 10

2025

Diploma, Mechanical Engineering

PACR Polytechnic College — 85%

2022

ACHIEVEMENTS

- Automated repetitive MEP and Civil modeling tasks via custom add-ins, improving team productivity.
- Integrated AI into BIM workflows via MCP, introducing a novel automation approach at the organization.
